

Tristan Simonnet 01021493

n/a

Folder Processed\_chunks-contains the output chunks processed and the top 5 of the chunks

Folder Small\_Normal\_Data- contains all data related to the normal dataset

- Folder Chunk-contains all chunks for the normal dataset
- CL\_processed\_chunks- output of the Claude model
- GPT\_processed\_chunks- output of the GPT model
- C\_small\_normal - Cleaned Normal dataset
- On\_demand\_report\_2026-04-18T18\_18\_50.439Z\_0c91c480-3b53-11f1-9003-bd29458e987d- Wazuh output scoring
- Small\_normal - dataset converted to CSV
- Small\_normal- original EVTX dataset

Folder Small\_suspicious\_logs-contains all chunks for the suspicious dataset

- Folder CL\_processed\_chunks - output of the Claude model
- Folder GPT\_processed\_chunks- output of the GPT model
- Suspicious\_chunks- contains all chunks for the Suspicious dataset
- C\_suspicious\_logs- Cleaned suspicious dataset
- On\_demand\_report\_2026-04-20T18\_29\_04.390Z\_cf569a60-3ce6-11f1-b73e-3bd7c4227409- Wazuh output scoring
- Security\_Suspicious- dataset converted to CSV
- security\_suspicious- original EVTX dataset

Folder TOP5- contains the top 5 data

- Folder Processed\_Top5
  - Claude\_NTOP- Overall top 5 for the Claude model with the normal dataset
  - Claude\_STOP- Overall top 5 for the Claude model with the suspicious dataset
  - GPT\_NTOP- Overall top 5 for the GPT model with the normal dataset
  - GPT\_STOP- Overall top 5 for the GPT model with the suspicious dataset
- Claude\_NTOP - Top 5 of each chunk from the Claude model with the normal dataset
- Claude\_STOP- Top 5 of each chunk from the Claude model with the suspicious dataset
- GPT\_NTOP- Top 5 of each chunk from the GPT model with the normal dataset
- GPT\_STOP- Top 5 of each chunk from the GPT model with the suspicious dataset

Chunker- used to break the large dataset into chunks

Claude\_top5- used to send the top chunks to Claude and get the overall top 5

Claude\_runner - Claude views each chunk and returns the summary and top 5

Combiner\_analysis - combines the processed datasets and creates a graph

Converter\_cleaning - converts the files from EVTX to CSV format and cleans the datasets

Final Report and Cost Estimate - contains the report and cost estimates from the project proposal.

GPT\_runner - GTP views each chunk and returns the summary and top 5

GPT\_top5- used to send the top chunks to GPT and get the overall top 5
